(3) Using Snap-On Tool No. MC-128, remove the fuel inlet seat retainer screw. Discard the retainer screw and gasket.

(4) Lift out the float and fuel inlet assembly and discard the gasket.

(5) Remove the float shaft retainer and separate the float and lever assembly from the fuel valve assembly by sliding out the float shaft. Discard all parts except the float and lever assembly.

(6) Remove the three economizer body cover screws and lockwashers.

(7) Lift the economizer assembly out of the main body and discard the gasket.

(8) Separate the economizer body cover from the economizer diaphragm and stem assembly. Discard the economizer diaphragm and stem assembly.
